Gosford SES purchased the Light Tower and have been impressed by its versatility and functionality. We have used it during training and have found it to be excellent during roof operations and outdoor night events. The light is a softer light, unlike the harsh flood lights and this enables our operators to retain their night vision. The fluorescent type light emitting from above the work site greatly reduces the shadow that normally accompanies flood lights. The light produces minimal heat and packs up very quickly. It is easily carried by one person (we purchased the unit without the Generator) Our members believe that this light will be very useful during any job that requires light from above, especially roof jobs and tree jobs.
